

**Magik-Benefits** is the only multi-insurer solution in the US and Canada that can simultaneously manage multiple group insurance benefit plans. Magik-Benefits improves and simplifies the entire group benefits management process and will generate savings from day one of implementation.

This unique software solution was specifically designed with group benefit managers in mind. Magik-Benefits handles all the activities associated with managing a group insurance plan from setting up a plan, to generating your group insurance invoice, to automating new employee premiums at probation end.

Magik-Benefits will help you manage membership, offer real-time online support to plan members and generate printed or online reports you can submit to your group insurance provider. Our partnerships with the major group insurance providers has allowed us to integrate our software with AGA Financial Group, La Capitale Insurance, Industrielle Alliance, Desjardins Financial Security - Group Insurance and many others.

### Magik-Benefits Features:

- Complete automation of group insurance management processes.
- Automatic probation management.
- Automatic collection of overdue premiums.
- Production of your group insurance invoice.
- Disability or maternity leave debit balance directly from the employee's bank account.

Most group insurance software, including software supplied by group insurance providers are able to calculate deductions and premiums. Few however, can offer a complete management solution able to calculate deductions and taxable benefits without ever having to get involved in the process. Magik-Benefits manages the entire group insurance plan, automatically calculates equivalent premiums and will advise your insurer in real-time of new added plan members. When any given employee receives a salary increase, your insurer is immediately notified and premiums are automatically adjusted for the following pay period.

No matter what changes are made to an employee profile, your insurer will always be notified to avoid any risk of error. Magik-Benefits will generate a group insurance invoice with statements you can use to avoid over payments or to detect omissions in deductions of new employee premiums.

Magik-Benefits will generate substantial savings that can be used toward other essential activities within your company.

Our products and services comply with all the provincial or state laws and regulations of Canada and the United States. We can also process payrolls for the construction industry at no extra cost.

From payroll data collection to cheque and pay slips, Magik-Pay will help you simplify payroll processing.
