

**Magik-Pay** is an advanced payroll management system that seamlessly integrates to widely used accounting programs such as Acoma, Advantage, Sage Accpac, Great Plains, SAP, SAP Business one or Simply Accounting.

Magik-Pay will simplify your payroll processing with automatic GL entries every pay period. You may also continue using your current time and attendance management system; Magik-Pay is integrated to Kronos (Workforce TimeKeeper), Exactsoft (Exact-Time), ITR (TimeZone), CGI (DataTrak), WinPunch (ActiveTime) and many more.

Magik-Pay is flexible and will adjust to the needs of your business depending on the sized of your company, the number of employees and your own level of involvement in the payroll process. Contrary to most payroll software programs that force you to adapt to their own solutions, Magik-Pay will adapt to your specifications. For example Magik-Pay has no limits on the number of earning and deduction codes. More than a simple deductions calculator, Magik-Pay automates the whole payroll process to efficiently manage vacation pay, multiple probation periods, collective bargaining agreements, group insurance benefits etc.

Magik-Pay is the only software in North America to completely automate all the complex parameters of your payroll process.

Our products and services comply with all the provincial or state laws and regulations of Canada and the United States. We can also process payrolls for the construction industry at no extra cost.

From payroll data collection to cheque and pay slips, Magik-Pay will help you simplify payroll processing.
