

Magik-Time is an advanced time management system that seamlessly integrates to your existing accounting package or external pay service. Whether you are using Acomba, Avantage, Sage Accpac, Great Plains, SAP, SAP Business one, Simply Accounting, CGI, Ceridian, ADP, Paywork or any other solution, Magik-Time will simplify the process by transmitting all the data on the number of hours worked to your pay system every single pay period. Magik-Time interfaces to your existing punch clocks or data collection terminals and recognizes widely used brands such as Symcod, Kronos, ITR, Acroprint, Simplex, CMI, Amano, Handpunch, Synel and many others.

You may however choose to use our own data collection terminals for a more perfectly integrated time management system.

Magik-Time Features:

- Real-Time monitoring of employee presence and absence.
- Multi-company, multi-division, multi-task management.
- Simultaneous access to multiple user data.
- Unlimited password and user profiles.
- Biometric, handpunch, fingerPrint detection.
- Schedule planning.
- Real-Time calculation of work presence.
- Unlimited number of schedules.
- Unlimited number of absence codes.
- Unlimited number of earnings codes.
- Integration to your existing pay system.
- Anomaly follow-up.
- Time cards calculated based on collective bargaining agreements.

No matter the complexity of your fixed or variable work schedules, the existence of multiple hour work banks and the number of full-time or part-time positions, Magik-Time will help you save time and money in schedule planning and real time monitoring of employee attendance. Our system allows you to easily manage every aspect of your employee payroll operations and will help you save between 25 and 50% of the time normally dedicated to processing payrolls. Monitoring and analysis of employee presence and absences will no longer be a tedious task.

There exists many categories of access control devices such as optical detectors, magnetic cards, proximity detectors and all types of biometrical equipment. Our terminals will allow users to add additional information such as justified absences, night shift bonuses, exceptional earnings, employee schedule or departmental schedule changes, new employee information etc. The data obtained through these terminals in conjunction with pre-defined schedule, absences and overtime parameters will help you calculate your payroll.

Magik-Time will allow you to enjoy a wider flexibility in managing schedules and employee attendance.

Our products and services comply with all the provincial or state laws and regulations of Canada and the United States. We can also process payrolls for the construction industry at no extra cost.

From payroll data collection to cheque and pay slips, Magik-Pay will help you simplify payroll processing.
